Product Features

Extreme WeatherPLUS® Add-ons improve our standard outdoor display cases sold throughout North America. While we continue to offer our wide selection of styles and sizes without these upgrades, outdoor locations exposed to harsh weather conditions require them to better withstand local weather. Below are the upgrades included;

- **Drip-Edge Roof**
The thin aluminum roof included has a slight bend at the end to help prevent water from entering through any potential gaps at the door or hinges when closed. The roof comes with a high-bond adhesive tape for mounting on top of the metal cabinet. When installing the WeatherPLUS® case, you can choose whether to add the protective roof or leave it off. You can always install it later or remove it altogether after the initial setup.
- **Rubber Gaskets**
One of the major improvements is the installed rubber gaskets along the inside edge of the door cavity. Although not completely waterproof or water-tight, it significantly reduces water from entering the case.
- **Side Vents**
Fin Style Vents are installed on both sides of the case. This allows the upper part of the case to release any condensation buildup and enables proper airflow to help maintain a clear view of the contents inside.
- **Additional Weep Holes**
We also include four weep holes on the cabinet bottom to let any condensation or water buildup escape easily. These bottom holes are placed slightly in front of and behind the backer board for better breathability.
- **Forbo® Bulletin Board Backer**
Available in over 15 colors, this bulletin board is self-healing, won't crumble, and is built to withstand most weather conditions. Forbo is made from natural and renewable raw materials. A blend of oxidized linseed oil, rosin, and finely ground cork gives this bulletin board its flexibility and strength. This combination results in a highly durable product with a sustainable footprint. Its durability and resilience make it perfect for pin boards, notice boards, and other surfaces where ideas and information are shared.
