- **FREE FREIGHT Shipping on All XL Sizes**
- Enclosed Letter Board Case **for OUTDOOR or INDOOR use**
- Letter Board panels are fixed into case and **NOT removable**
- Metal Case must be surface mounted on the wall
- Call for Custom Extreme WeatherPlus<sup>®</sup>,<sup>®</sup> Letter Board Display Cases

#### Product Features

Our Extreme WeatherPlus<sup>®</sup>,<sup>®</sup> Add-ons are an upgrade from our standard cases we've sold for 30+ years. While we still sell our vast selection of styles and sizes without the enhancements below, some extreme locations require these upgrades to best accommodate their local weather challenges. Below are the upgrades we include;

- **Drip-Edge Roof**  
The thin aluminum roof provided, has a slight bend at the end, to help mitigate water from entering any possible exposure through the door or hinges when closed. The roof provided comes with a high bond adhesive tape to install onto the top of the metal cabinet. When mounting and installing the WeatherPlus<sup>®</sup>,<sup>®</sup> case, you can decide if you want to add the protective roof, or leave it off. You can always install it at a later date or remove it altogether after initial installation.
- **Rubber Gaskets**  
One of the bigger enhancements is the installed rubber gaskets placed on the inside perimeter of the door cavity. Though not water-proof or 100% water-tight, it greatly mitigates water from entering the case.
- **Side Vents**  
Placed on both sides of the case are Fin Style Vents. This allows the upper portion of the case to release any condensation build up, and allow for air flow to properly assist in providing a clear viewing of the contents inside.
- **Additional Weep Holes**  
In addition to the side Fin Vents, we also provide a total of 4 weep holes at the bottom of the case, which allows for any condensation or possible water build up, to release with ease. The bottom holes are positioned slightly in-front of the backer board and then behind it, for maximum breathability.
- **Hanging Brackets- for Wall Mount**  
When drilling holes though the backer board, there is an opportunity for water to seep into the backside of the case. As an option we've included top and bottom metal hanging brackets to help avoid this. You still can drill through the backer board, but this provides an alternative mounting method.

**IMPORTANT: Whichever way you decide to mount the case, remember to apply a clear silicone sealant around the perimeter of the backside of the case, and around any holes drilled directly into the metal cabinet.**

#### Lighting Information

- UL approved LED Strip Lighting
- Cool White LED Lighting
- LED Life: 50,000 hours

\*\*We provide a 3-wire cord attached to the ballast / transformer inside the display case. When installing you should use a licensed electrician / installer to bring power to the display. The installer will best decide where to exit the hardwire provided (we do not provide an exit hole as we feel it's best for the installer to decide the best exit point for power supply).

We offer **TWO** LED Lighting Options as detailed below:

#### TOP LIGHTING (ONE SIDE)

For this option we place an LED strip light on the top side of the interior display case. The light will shine downward onto the interior case, highlighting the contents inside.

#### INSIDE PERIMETER (ALL 4 SIDES).

For this option we place an LED strip light along the entire Perimeter of the interior display case. The light will shine from all 4 sides of the interior case, bringing more light intensity to the contents being displayed inside.

### Ordering Options

- Frame Orientation: Portrait or Landscape
- 4 Metal Frame Finishes: Silver, Black, Bronze, and Gold
- 2 Felt Letter Board panel colors: Black and Grey
- Optional letter & character sets (1/2", 3/4", 1", 2", 3")
- **Door Window: Break Resistant or Tempered Glass**
  - Break Resistant Acrylic: 1/8" thick, lightweight (Standard)
  - 1/4" Tempered Glass for public environments and locations that require this added safety feature. (Upcharge)
    - If chosen we will use our heavy duty door that will change one of 2 dimensions by 1/2". We will contact you if you do not indicate which dimension you would like adjusted in your order notes.
    - The viewable area can decrease by 1/2" or the overall size can be increased by 1/2".
